Rhel Kernel Versions

Fedora vs Red Hat

Comparison Chart

| Fedora	Red Hat
Fedora is a general-purpose operating system built over the Linux OS kernel architecture.	Red Hat is more like a corporate version based on the Fedora Project.
Fedora is open-source and free to use, modify, and distribute.	RHEL is typically sold through an annual subscription.
New releases of Fedora Core occur about every six months which is far too often.	Red Hat follows a 12-18 month release schedule rather than 6 months.
Fedora is not a supported Red Hat product, so not recommended for production environments.	Red Hat provides technical support and maintenance during stated time periods.
